## Drug discovery alliances

- In order to realize our vision of drug discovery originating from across the Asian region, we will initiate activities that facilitate information exchange, build networks that promote direct discussion, and establish an environment in which it is possible for industry, the public sector, academic institutions, and venture companies in Asia to cooperate. Our short-term goal is to create a platform for open innovation that creates and improves the drug discovery capabilities of each Asian economy.
- To support this platform and in order to further foster partnerships in Asia that cross national borders, we will advance our activities for the promotion of open innovation through symposiums and conferences related to drug discovery in Asia.
